About me

From the designing of Currency Converter on Delphi back in high school, I knew that world of programming irrevocably attracted my attention. In my freshman year, I had an obscure desire to automatize the code the way that any change could be implemented easily. The excitement from these little things grew into passion and desire to become Web Developer.

Below you can find my experience and some of the projects I have developed, that can show my general knowledge and skills as a backend software developer.

Working Experience

WebStrap

Krasnodar, Russia

NodeJs Intern

August 2022 - Present

- o Debugged and refactored existing application
- o Wrote integration tests on Jest
- o Wrote features for authorization via Google ID, VK ID, Yandex ID.

Projects

Secret Santa API

- o Built Secret Santa API which randomly chooses secret Santas for the list of players and sends e-mails to them with the name of corresponding player.
- o Tech Stacks: Node, Express, NPM, Git

Alcohol Store API

- o Designed Alcohol store API which can create, update, search and delete alcohol units and orders by users.
- o Able to register, login users and generate tokens.
- o Tech Stacks: Node, Express, NPM, MySQL, JWT, Git

Books API

- o Developed Books API which allows to create, update, search and delete books and authors in database.
- o Tech Stacks: Node, Express, NPM, GraphQL, PostgreSQL, Docker, Git

Skills

- o Programming languages: JavaScript, Golang, Python
- o Major technologies: NodeJS, MySQL, PostgreSQL, ExpressJS, NPM, Git
- o Minor technologies: GraphQL, Docker
- o Languages: Kazakh (Native), Russian (Native), English (Advanced)

Education

Nazarbayev University

Nur-Sultan, Kazakhstan

Bachelor's degree in Chemical and Materials Engineering

August 2019 – June 2023

Activities: Member of Nazarbayev University Women's Football Team

September 2018 - Present
